AREA OF INTEREST

- Programming
- Artificial intelligence
- Robotics
- Historical Films
- Anime

SKILLS

- Python (Pandas, Numpy, Matplotlib, Scikit-learn)
- Java / C / C++ / SQL
- Web Scraping
- HTML, CSS, JS, React.js

LANGUAGES

Arab	Native
French	Fluent
English	Fluent

About Me

Data Analyst & Artificial Intelligence Developer, passionate about data analysis, machine learning, and software development. With strong programming skills, I have gained practical experience through academic and personal projects. Motivated and meticulous, I am eager to leverage my technical skills and analytical mind to design innovative, high-impact, data-driven solutions.

Training

- **Baccalaureate (High School Degree) in Physical Science**
2021 – 2022
Moulay Youssef High School - Oulad Berhil, Morocco
- **Associate's Degree (DEUP) in Computer Engineering** 2022 - 2024
Multidisciplinary Faculty - Taroudant, Morocco
- **Bachelor's Degree in Data Analysis & AI** 2024 - 2026
Faculty of Sciences - Agadir, Morocco

Projects

- **Handwritten Cipher Recognition in C (MNIST)**
Description : Complete C implementation of a neural network to load, process and recognize handwritten digits from 28x28 images.
Results : Model capable of accurately predicting on new images.
- **Breast cancer diagnosis classification**
Description: Development and comparison of several classification models (Logistic Regression, KNN and Decision Tree) to predict whether a tumor is benign or malignant from medical data.
Results: Evaluation of model performance, selection of the best model and export of models and preprocessing pipelines with Joblib for production use.
